

# Bean Truck Unload and Compuweigh

602 Industrial Road, Iowa Falls

Each truck will need a Compuweigh card to be recognized while traveling within our facility. Cards need to be clipped to your visor. We can mail your cards or if you arrive and need to set up a card, the Graders can do that for you. We will need your truck make, color and license plate number to create your unique card. Only one card can be in a truck at a time. If you will be hauling for multiple entities or have various splits, that can be altered at time of delivery by the Graders.

Enter the site from Industrial Park Road. Follow the drive around the facility to the Probe (Yellow lines). After probing, follow the drive to turn around into the plant (Orange lines). Drive forward and exit out the same drive you entered.
